

# NUTRITION-ASSISTANT APPLICATION

Team Leader : Shailaja V  
Team Member 1 : Shabrin Begum S  
Team Member 2 : SatvikSreeram V  
Team Member 3 : Sangeeth Kumar A

## Proposed Solution Template

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<ul style="list-style-type: none"><li>• The project aims at building a web App that automatically estimates food attributes such as ingredients and nutritional value by classifying the input image of food.</li><li>• Our method employs <b>Clarifai's AI-Driven Food Detection Model</b> for accurate food identification and Food API's to give the nutritional value of the identified food.</li></ul>
2.	Idea / Solution description	<p>The proposed system has the following features:</p> <ul style="list-style-type: none"><li>• Customized and easy to access interface.</li><li>• Individual chat rooms with options of fixing appointments for counselling.</li><li>• Options of capturing data from counselling session for future references.</li><li>• Counselling for disease oriented diet plans like Ketogenic diet.</li><li>• Suggest diet plans.</li><li>• Calorie counter for selected food item.</li><li>• Alternative dish with required calories.</li><li>• Calorie values of more than 1000 International and Indian cuisines.</li><li>• Interesting notes on selected food items.</li><li>• Recorded health history.</li></ul>

3.	Novelty / Uniqueness	<p>The following features adds uniqueness to this project:</p> <ul style="list-style-type: none"> <li>• User interacts with the Web App to Load an image.</li> <li>• The image is passed to the server application, which uses Clarifai's AI-Driven Food Detection Model Service to analyse the images and Nutrition API to provide nutritional information about the analysed Image.</li> <li>• Nutritional information of the analysed image is returned to the app for display.</li> </ul>
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> <li>• The customer satisfaction is very well improved for getting appropriate response from the nutritionist immediately.</li> <li>• As soon as the user uploads the image, within few seconds the prediction result page will be displayed which highly improves the customer satisfaction.</li> <li>• The key customer satisfaction factor is consistency. The consistency is the secret ingredient to make customers happy.</li> </ul>
5.	Business Model (Revenue Model)	<ul style="list-style-type: none"> <li>• Different algorithms are used to correctly map the food items that has been uploaded by the user.</li> <li>• Appropriate algorithms are used to display the prediction result page.</li> </ul>
6.	Scalability of the Solution	<ul style="list-style-type: none"> <li>• The project is capable of handling growth, especially in handling more users and evolving concurrently with the business needs.</li> <li>• It also relates to the app's backend, database and the servers they are hosted on which is highly satisfied by this project.</li> </ul>
