Team Member 3 : Sangeeth Kumar A

Solution Architecture

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:
• Find the best tech solution to solve existing business problems.
• Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
• Define features, development phases, and solution requirements.
• Provide specifications according to which the solution is defined, managed, and delivered.
